===== WIRELESS SCRCPY USER GUIDE

WELCOME TO WIRELESS SCRCPY.

THIS APPLICATION ALLOWS YOU TO DISPLAY AND CONTROL YOUR ANDROID PHONE'S SCREEN ON YOUR COMPUTER WIRELESSLY (WITHOUT A CABLE).

FOLLOW THIS GUIDE STEP-BY-STEP TO GET STARTED.

PART 1 : SETTING UP YOUR PHONE (ONE-TIME-ONLY SETUP)

YOU NEED TO ENABLE A FEW HIDDEN SETTINGS ON YOUR PHONE.

1. ENABLE DEVELOPER OPTIONS :

- OPEN "SETTINGS" ON YOUR PHONE.
- SCROLL TO THE BOTTOM, FIND AND ENTER THE "ABOUT PHONE" MENU.
- FIND THE "SOFTWARE INFORMATION" MENU.
- FIND THE "BUILD NUMBER" ITEM.
- TAP ON "BUILD NUMBER" 7 TIMES IN A ROW.
- A NOTIFICATION WILL APPEAR : "YOU ARE NOW A DEVELOPER."

2. ENABLE USB DEBUGGING :

- GO BACK TO THE MAIN "SETTINGS" SCREEN.
- THERE WILL NOW BE A NEW MENU CALLED "DEVELOPER OPTIONS". OPEN IT.
- FIND THE "USB DEBUGGING" TOGGLE AND TURN IT ON.
- IF A PROMPT APPEARS, SELECT "OK" OR "ALLOW".

CONGRATULATIONS, YOUR PHONE SETUP IS COMPLETE.

PART 2 : THE KEY STEP (CHOOSE ONE METHOD)

THIS IS THE MOST IMPORTANT STEP THAT "OPENS THE DOOR" FOR A WIRELESS CONNECTION. CHOOSE THE METHOD THAT MATCHES YOUR ANDROID VERSION.

METHOD A (FOR ALL ANDROID VERSIONS) : ACTIVATION VIA USB CABLE

USE THIS METHOD IF YOU ARE UNSURE OF YOUR ANDROID VERSION OR IF YOUR PHONE IS BELOW ANDROID 11. THIS STEP NEEDS TO BE REPEATED EVERY TIME THE PHONE IS RESTARTED.

1. CONNECT PHONE TO COMPUTER :

- USE A USB CABLE TO CONNECT YOUR PHONE TO YOUR COMPUTER.

2. AUTHORIZE THE COMPUTER :

- ON YOUR PHONE'S SCREEN, A POP-UP "ALLOW USB DEBUGGING?" MAY APPEAR.
- CHECK THE "ALWAYS ALLOW FROM THIS COMPUTER" BOX, THEN TAP "ALLOW" .

3. RUN THE ACTIVATOR :

- IN THIS FOLDER, FIND THE FILE NAMED "AUTOADBTCPIP.BAT" .
- DOUBLE-CLICK THIS FILE TO RUN IT.
- FOLLOW THE ON-SCREEN INSTRUCTIONS (PRESS ANY KEY TO CONTINUE) .

4. DONE .

- AFTER THE "SUCCESS." MESSAGE APPEARS, YOU CAN UNPLUG YOUR USB CABLE.
- YOUR PHONE IS NOW READY TO BE CONNECTED WIRELESSLY.

METHOD B (FOR ANDROID 11 AND UP) : FULL WIRELESS ACTIVATION

USE THIS METHOD IF YOU KNOW YOUR PHONE IS RUNNING ANDROID 11 OR NEWER. IT DOES NOT REQUIRE A USB CABLE AT ALL AFTER THE INITIAL SETUP.

1. RUN THE WIRELESS HELPER :

- IN THIS FOLDER, FIND THE FILE NAMED "WIRELESS_ADBTCPIP.BAT" .
- DOUBLE-CLICK IT TO OPEN.

2. CHOOSE OPTION 1 - "PAIR NEW DEVICE" (FOR THE FIRST TIME ONLY) :

- FOLLOW THE ON-SCREEN INSTRUCTIONS TO PAIR YOUR COMPUTER WITH YOUR PHONE.
 - YOU WILL NEED TO GO TO THE "WIRELESS DEBUGGING" MENU ON YOUR PHONE AND ENTER THE DISPLAYED CODE AND IP/PORT.
3. CHOOSE OPTION 2 - "CONNECT TO PAIRED DEVICE" (FOR DAILY USE) :
- AFTER THE DEVICE IS PAIRED, YOU ONLY NEED TO USE THIS OPTION FROM NOW ON.
 - FOLLOW THE INSTRUCTIONS TO ENTER THE CONNECTION IP AND PORT FROM THE "WIRELESS DEBUGGING" MENU ON YOUR PHONE.
4. DONE .
- ONCE CONNECTED, YOUR PHONE IS READY TO BE SCANNED BY THE MAIN APPLICATION.

PART 3 : RUNNING THE MAIN APPLICATION

NOW IT'S TIME TO START MIRRORING.

1. CHECK WI-FI CONNECTION :
- MAKE SURE YOUR COMPUTER AND PHONE ARE CONNECTED TO THE SAME WI-FI NETWORK.
2. RUN THE MAIN APPLICATION :
- IN THIS FOLDER, DOUBLE-CLICK THE FILE NAMED "WIRELESS_SCRCPY.BAT" .
 - THE APPLICATION WILL OPEN IN FULLSCREEN MODE.
3. CHOOSE YOUR CONNECTION METHOD :
- OPTION 1 : SCAN NETWORK (MOST RECOMMENDED) THE APPLICATION WILL SEARCH FOR ALL ACTIVE PHONES ON YOUR NETWORK.
 - OPTION 2 : CONNECT FROM SAVED IPS VERY FAST IF YOU FREQUENTLY CONNECT TO THE SAME DEVICES.
 - OPTION 3 : CONNECT WITH MANUAL IP USE THIS IF YOU KNOW THE EXACT IP ADDRESS OF YOUR PHONE.
4. ENJOY MIRRORING .

- YOUR PHONE'S SCREEN WILL NOW APPEAR ON YOUR COMPUTER, AND YOU CAN CONTROL IT WITH YOUR MOUSE AND KEYBOARD.

TROUBLESHOOTING

Q: "MY PHONE IS NOT FOUND DURING A NETWORK SCAN." A: MAKE SURE YOU HAVE ALREADY COMPLETED ONE OF THE METHODS IN PART 2. IF YOU ARE USING METHOD A, ENSURE YOU HAVE RUN "AUTOADBTCPIP.BAT" AFTER RESTARTING THE PHONE. ALSO, MAKE SURE BOTH THE PHONE AND COMPUTER ARE ON THE SAME WI-FI NETWORK.

Q: "WHAT'S THE DIFFERENCE BETWEEN 'AUTOADBTCPIP.BAT' AND 'WIRELESS_ADBTCPIP.BAT'?" A: 'AUTOADBTCPIP.BAT' IS FOR THE CLASSIC METHOD VIA USB (ALL ANDROID VERSIONS). 'WIRELESS_ADBTCPIP.BAT' IS FOR THE NEWER, FULLY WIRELESS FEATURE (ANDROID 11 AND UP ONLY).

Q: "HOW DO I SAVE AN IP TO CONNECT FASTER?" A: IN THE MAIN MENU, CHOOSE "MANAGE IP LIST" TO ADD OR DELETE YOUR FAVORITE IPS.
